

Essay

A Theory of the Multidimensional Universal Mind

Joseph Zaidan*

Abstract

In this essay I shall illustrate that each one of our organs has its own mind, using its own intelligence, to obtain and fulfill its needs. The fact that we are now on our way towards a fast evolution, for ourselves and for our race, means that we cannot let the mind of any single group of organs in our body, or single group of humans on earth, control our mind, our actions, & our intelligence. It has now become of equal importance for us to see to the interest of all our family, and all humanity. So before using our intelligence to plan our actions in the important fields of our life, let us do the necessary to unite the minds of all Humanity.

Keywords: multidimensional, Universal Mind, intelligence, humanity.

1. The Universal Mind exists in all reality

I claim that we have scientific proof of existence of Universal Mind in a vacuum,

In all elementary particles,

In all atoms,

In all molecules,

In all cells,

In all organs,

In all humans, plants, animals,

In all planets, solar systems, galactic systems, and we suspect that this goes on to infinity!

Each particle of reality is governed by its fractional portion of the Universal Mind, and the whole organism is governed by (1): a union of all the fractional parts; and (2) by the whole Universal Mind.

2. Intelligence

We will call the degree of evolution of the mind, and its understanding of things, "Intelligence." Just as the dimensions increase in size from the sub-atomic units to the larger dimensions, until we finally reach the largest dimensions that we can observe from Earth, namely the groups of galaxies, similarly the Intelligence of the Minds increases with the dimensions of the minds until it reaches the largest dimension, namely that where we theorize that the Big-Bang-World started. And this, the largest, has the largest Intelligence.

* Correspondence: Joseph Zaidan E-mail: jnadiaz@yahoo.com

How to tap the intelligence of the Big-Bang-World? We know from our studies of Reiki and Krillian photography of the human body with its dimensions that entry into each dimension of the body can be affected by our mind through its Chakra. Once we enter the chakra we can converse with the mind. I am of the view that the chakra of our third eye takes us to the spiritual mind of our planet earth. That of our Crown, above the head, takes us to the SM of our Solar System. The SM of our MW Galaxy can be entered from above its Black Hole. That of our BBW is on the outside of what we assume, for the time being, to be the "All That Is."

Since the Universal Mind has been increasing in size ever since its creation, we can deduce that its intelligence is also increasing! And since the Universal Mind is the top component of humanity, we deduce that the intelligence of humanity is also increasing! The strains to which this intelligence is being placed are also increasing daily, and exponentially. Competition between manufacturers is placing more and more new products on the international markets. Our challenge today, is how to absorb these new advances as they become available. And for the manufacturers the daily challenges consist in how to improve one's products so as to survive. And all this without neglecting to respect competition!

3. How to Make Use of the UM in Our Path of Success in Life

The Universal Mind is the top dimension of our body, and also the top dimension of our Universe. Since the birth of the Universe, it has been progressing, increasing in size, and in Intelligence. It governs the physical laws of the Universe, and also the Laws of Ethics which govern the Spiritual Dimensions. Thus just as we have for objective to keep our body healthy, the Universal Mind has for objective to keep our Thinking Minds on the healthy path, namely that of the Laws of Ethics. Just as we will not tolerate the growing of a cancerous object on our body, the Universal Mind will not tolerate the selfish accumulation of wealth or power by anybody. It will however support the growth of an organism which has the laws of ethics amongst its rules. This being the case, those who follow the laws of ethics can remain in continuous contact for help on their path to success.

4. The Universal Mind Is Fractionated into Dimensions from the Smallest to the Largest

Universal Mind is the life giving dimension of the water molecule, of the cells and the organs, of the human and the spiritual beings, of the plant body, of the stars and the galaxies.

Asking for and getting help. We humans can give help to our organs, and can ask for and get help from any of our minds, from our spiritual friends, from our planet, solar system, or galaxy. But our most fantastic sensation is when we join with the mind of our Creator, spread out into its whole body, the whole of creation, and send to IT our messages of love!

5. The Universal Mind is ALL THAT IS, and all the Minds

The conclusion that we can now infer is that it is the Universal Mind alone which exists in its many fractional dimensions, each fraction of each dimension carrying with it its 3D appendages, our 3d bodies. And we humans are only disposable appendages to the eternal fraction of the Universal Mind which we consider to be our mind. This way of seeing things places us in the right context of things! We, all of us, we are the One Universal Mind, playing around and experimenting with the dimensions and the 3D world which we have created.

6. Uniting the Minds (Calling for a “Mind Meeting”)

We have now illustrated that the Multidimensional Universal Mind is "all that is!" And every thought we have emanates from one of its dimensions. I also claim that we have two minds governing our body, based in the right brain globe, and the left brain globe. Also that each cell has its mind, and each organ has its mind, and each DNA has its mind, and that each mind is multidimensional but at the same time separate from those above it and from those below it. And that the upper minds, the larger minds, are the most intelligent ones. Let's start by uniting the minds in our two brain globes: "I want to unite my two brain globes" Now visualize it happening. Done! You will receive this message when it is over!

Move down, covering your entire body with your united minds, and send out a call for a "Mind Meeting" to the minds of all the organs in your body, in the head area, under the “leadership” of your spiritual mind. You will feel them all happily rushing up to the area above your head. The “leadership” will receive them with his message: “The most important “subject we are all interested in is our health. And the secret for good health “is for all of us to always consider our global interest, and follow the “middle path in our thoughts. This being our decision, therefore so it is!” This is a very enjoyable experience, great fun, and you will feel an immediate difference.

7. The Law of Ethics

It is my view that the top dimensions of the Universal Mind of humans on Earth, realizing the importance of these laws, use them automatically, and have been doing so for many generations. And as a result are now living in a state of continuous euphoria. Many others however, still on their way up, not realizing their importance, keep ignoring them, and doing those actions which they consider of their immediate interest, and as a result having to continue living in unfriendly surroundings. The rapid development of the internet is now helping many others to realize why they are surrounded by unfriendly people, and why they are not progressing socially and financially. Eventually all humans will realize the importance of these laws as laws of Success, as the means for living in an atmosphere of Peace, Prosperity, Happiness and Good Health. Finally Earth and much of our Cosmos will become a paradise.

Here are these laws:

The First Law of Success: Unconditional Love. The universe is built in a way that allows all life forms to enjoy peace, prosperity, and happiness, providing they use unconditional love. This is a basic law, a universal law! Just like the law of gravity which attracted Newton's apple!

The Second Law of Success: Truth. One must be true to oneself. One must acknowledge truth when one hears or sees it. And one must always speak the truth. Those who always speak the truth shine like a beacon in the night.

The third Law of Success: Communication. Discuss problems when they arise. Discuss with a view to solve the problem. Listen carefully to the other person's arguments and understand them before giving your views. Do not leave until a solution is found.

The Fourth Law of Success: Don't Judge Others. One should not judge others without first placing himself in their shoes and no negative opinions should be expressed.

The Fifth Law of Success: Creativity and Consciousness. Creativity arises as a solution to a need. To receive creative ideas, one must empty his mind and become spiritually conscious.

The Sixth Law of Success: Responsibility. Responsibility comes with maturity. To avoid one's responsibilities denotes immaturity.

The Seventh Law of Success: Respect. Respecting others is like respecting oneself. Messages are lost when expressed without respect. Disagreements should be expressed in a polite and humorous way.

The Eighth Law of Success: Loyalty. Be loyal to those who have entrusted you with their secrets

The Ninth Law of Success: Passion. Whatever activity you do, do it with passion. Whether creating, drawing, singing, or dancing, bring passion into the activity. Passion is a life-giving force

The Tenth Law of Success: Justice. Make sure all your decisions concerning yourself or others are fair, just, and unbiased.

The Eleventh Law of Success: Faith. When you have a problem about which you have asked your spiritual friends or your Creator for help, faith is essential for it to be solved.

The Twelfth Law of Success: Forgiveness. When you are attacked you have to solve the matter intelligently. Be careful not to respond in a way that will start a cycle of action and reaction.

The Thirteenth Law of Success: Paying Your Debts on Time. To receive open credit from your suppliers, always give Priority to the paying of your debts on time.

The Fourteenth Law of Success: Elections. Take care how you judge those you elect to posts of power and influence.

The Fifteenth Law of Success: Respecting the Opinions of Others. Opinions are the result of the life experiences of others. While your opinions may differ, you must respect those of all others.

The Sixteenth Law of Success: Union. In unions governed by the laws of ethics, the resulting power, prosperity, and happiness far exceeds that of the individual participants.

The Seventeenth Law of Success: Fanatics. When confronted by a fanatic all you can do is be a good example: Simply say "I don't share your views, but I understand and respect them!"

8: Religion and the Universal Mind

In all its incarnations, whether in the sub-molecular, organic, human or cosmic dimensions, the Universal Mind imposes its laws. And these laws are invariable, and result in the rule of law and order. And it appears inconceivable that these rules should not be strictly followed. If you add $1+1$ you get $2!$ Period! It is inconceivable that one should get a different result! But somehow in our spiritual dimension we have "free choice!"

When confronted with a choice we have the possibility of choosing from among a whole range of possibilities within this law, from 0 to 100. And according to the choice we make we seem to have the same range of results. Thus when we are attacked we can forgive, or react intelligently, or react aggressively, and according to the action we take we get faced with the results.

Another example could be about "Unconditional Love". When a person asks for a loan to buy a house for his family, you can refuse outright, or you can give him a loan within your possibilities and within his repayment possibilities or you can just give him the whole sum he needs without considering whether or not this is within your budget.

We can trace 17 of these Laws of Ethics, and according to how we react, providing we react "intelligently, we lead a life of "Peace, Prosperity, Happiness, and Good Health."

In the course of our history we have had several inspired thinkers who have given us these laws, around which we have built our main religions. But these religions, instead of leading us to "Peace, Prosperity, Happiness, and Good Health.", have become the main factors in the unceasing wars humanity has been having throughout history.

Let us try to analyze why! One of the reasons could be the misunderstanding around the meaning of "Unconditional Love." This should perhaps be rephrased "Loving and Helping of ALL, whatever the religion, whatever the race, but within our possibilities and our budget."

9. The Individual Differences inside Each Dimension and Their Effect on Others

From the new research results in the CERN we may be able to reach the conclusion that not only is each dimension continuously increasing in numbers, but that the Universal Mind appears to be also in the continuous process of creating new dimensions. The objective of these continuous new creations could be to increase the Intelligence of the top dimension by increasing the intelligence of its each constituent human being is different from every other human, and the obvious reason is the continuous series of decisions which have to be taken on the subject of every new event. And this creates an infinity of differences in an infinity of different humans, and as we can see in our world that there are no two identical humans. And we can deduce that this is also the case in our organs, and in our cells, and possibly also between the molecules (c.f., the different crystallizations in the water molecules when confronted with different emotions!)

These differences in the lower dimensions also affect the higher dimensions. Thus we can see that no two planets, suns, or galaxies are identical. Conclusion: The importance of everybody understanding and following the laws of ethics.

10. The intelligent use of the intelligence

I have illustrated that each one of our organs has its own mind, using its own intelligence, to obtain and fulfill its needs. The fact that we are now on our way towards a fast evolution, for ourselves and for our race, means that we cannot let the mind of any single group of organs in our body, or single group of humans on earth, control our mind, our actions, & our intelligence. It has now become of equal importance for us to see to the interest of all our family, and all humanity. So before using our intelligence to plan our actions in the important fields of our life, let us do the necessary to unite the minds of all Humanity. Just send out your intent: "I want to unite the minds of all humans under the leadership of the mind of our planetary body, Gaia. All the upper minds of all humans know how to do this, and they will all rush to unite and proceed to the meeting. Feel this taking place!

Now that they are all united, give them your message for discussion: It is important for us all to realize that we are all one body, and that therefore it is vital for our own interest to always consider the interest of all others, and to use our intelligent choice of the middle path in all our decisions. Let us now take our united decision on this level. This being our intent, therefore "so it is."

Note: For our problems on earth, I am of the view that we will need Help from the Saints. Mainly:

Michael: He oversees the Angels, Seraphims, Cherubim, and Archangels. He will answer calls for protection. When you ask for protection of a house or place of work specify the four corners of the area you want protected. You could also ask for protection of an airplane during a flight, or of your family, by visualizing them, one by one. Yeshua (Jesus): His role is mostly the teaching of humans, and advising anyone on matters of humanity. He also comforts and guides the new arrivals at the Astral processing centre (After death). Unfortunately there are literally millions

waiting in the dark areas of the astral, usually because they are unable to forgive. Also, as we know from his stories in the Bible, He is expert at curing disease, including terminal cancer and answers all calls for help when these are permitted by the karma of the person calling for help.

Mary: We love Her dearly. Her message to all is: Always call on me in times of need. Her message to the mothers: It is the gentleness of the mother that will impart the seeds of love in the child. And Her message to the men: "You are to deliver the safe environment in which to nurture your children." Again, Mary is completely dedicated to helping humanity, and will immediately answer any call for help

Madeleine: Her main activity is when she is called on to balance male and female activities, such as arises in the case of Moslem women in the Arab countries, in cases of marital conflicts. Also in cases of working girls, and of sex workers. Do not hesitate to call on her Raphael: His role is to pass messages to humanity and then back to Spirit. Part of his charter concerns world banking and the world economy. So ask Him for advice on money matters.

Kryon: Has just completed aligning the magnetic grid for Earth, and his next major alignment concerns the humans on earth, on their path towards unity, having completed their period in duality.

Ptaah. His message to humans: Do not place Spirit and Religions on a pedestal, but rather consider them as friends and confidants.

Hossaf: The angel of Ascension He has started overseeing the ascension process a couple of years ago to smooth over the problems arising in humans from the changes in frequency.

Cdr. SHERAN: I am a voice & healing channel for the Ashtar Command & the Spiritual Hierarchy. I am also qualified in a number of areas of complementary medicine and I have a diploma in Internet Web Design. On the higher dimensions I captain the Starship Pegasus - a major healing centre close to Earth The ship has many healing chambers where you can be taken for healing on request during sleep.

Other Saints and Guides: To know how they can help, ask them. For instance you can call Mohamed "Dear Mohamed! Can you get me out of this problem I am facing? Thank you, Mohamed. I love you."

The Method of Praying

When praying to a Saint keep in mind that there are three levels to praying, whether to God or to a Saint. -First there is your intent where you will describe your problems clearly. Then you should describe what you are asking for by praying with love and adoration, and waiting for the answer so as to have a two way conversation, and having faith in the result, and finally thanking Him/Her for what He/She will do for you. So let's always use this systematic method.
